Profile

UX / Product Designer with 4+ years of experience designing scalable digital products in high-impact environments across e-commerce, logistics, and fintech. Proven track record leading end-to-end design on complex platforms, from fulfillment and logistics to credit products, across user flows, interaction patterns, information architecture, and design systems. Strong background in interaction design, usability, and behavioral psychology, with experience applying AI to automate design and product workflows and collaborating cross-functionally with Product Managers, Engineers, and Business stakeholders to deliver data-informed, user-centered solutions that drive operational efficiency and business outcomes.

Experience

RappiPay — Product Designer

April 2026 – Present

- Designed the onboarding, graduation module, and credit card experience adaptation for the launch of the new secured card, covering the full product cycle from user activation to graduation into an unsecured product.
- Led version 8 of the RappiPay design system, defining the evolution of components, tokens, and usage guidelines for product and engineering teams.
- Co-designed an end-to-end workflow combining AI and human judgment for initiative creation: built custom skills to automate the repeatable stages of research, writing, and documentation, and defined the checkpoints where the team validates, decides, and adds context. Discovery went from one month to two weeks, with more consistent deliverables and no trade-off in the quality of product decisions.

Mercado Libre — UX Designer / Content Designer

December 2022 – January 2026

- Led end-to-end UX and product design for Fulfillment by Mercado Libre, defining user flows, interaction patterns, and information architecture for sellers across Latin America, China, and the United States.
- Owned key design decisions for shipment planning and inventory management, balancing user needs, business goals, and operational constraints.
- Redesigned the Shipment Planning experience, improving clarity, prioritization, and decision-making within complex logistics workflows.
- Designed an interaction and incentive strategy that increased average warehouse stock in Brazil from 10 to 20 days, directly impacting fulfillment efficiency.
- Partnered closely with Product, Engineering, and Business teams to align requirements, validate solutions, and scale improvements across the platform.

LAVALENTINA Design – Copywriter & Brand Designer

February 2022 – December 2022

- Developed brand concepts, naming systems, and language guidelines for 10+ brands across different industries.
- Translated brand strategy into consistent digital messaging and content systems.
- Collaborated with designers to ensure coherence between brand identity and digital touchpoints.

Binalogue S.A. — Junior Copywriter

June 2021 – November 2021

- Produced digital content for international clients across social media, newsletters, and web platforms.
- Supported content production workflows and coordination processes.

Universidad de los Andes — University Professor

January 2020 – June 2021

- Taught academic writing and critical thinking.
- Designed lesson plans using mixed instructional methodologies.

Education
